

Software Growth in China
一起建桥梁

STEPHEN R. WALLI
CHINA FOO
BEIJING
NOVEMBER, 2007

我是加拿大人

我住在美国

我关心开放代码软件在中国的发展

开放代码软件对中国未来的发展很重要

China will build better software more quickly
China will build more successful companies faster

10 Lines of code per day
1 Error/1000 Lines of code

Building Successful Companies Faster

多少人看得懂这句？

How many people can read this second line too?

语言创造文化

Language creates Culture

A community is just a group of people with something in common. They don't have to like each other.

— Bob Young

"... but they do need to be able to understand one another!"

— Stephen Walli

An Experiment in Trust

我北京的朋友是我的桥梁
他们是我语言之桥
他们是我文化之桥
他们是我信任之桥。

"You're explaining open source licenses to us like we care about the license."

他们不关心产权吗？
他们不关心社会吗？
他们不关心一张纸吗？

"I do not think it means what you think it means."
— Inigo Montoya

一起建桥梁

一起我们的社会会更大
我要了解你们怎么共享软件
我要共享我开放代码软件和它社会的经验
我们需要一起学会讲新的文化。
